

Tasforests

Special edition

*A collection of papers from the symposium 'Changes in Tasmania's Terrestrial Vegetation'
presented at the 59th congress of ANZAAS, Hobart 1990*

Symposium convenors: Frank Podger and Mick Brown

Vol. 2 (2)

December 1990

Contents

	page
Introductory Remarks <i>Frank Podger</i>	87
Sixty Million Years of Change in Tasmania's Climate and Vegetation <i>Robert S. Hill</i>	89
Tree-rings as Indicators of Environmental Change <i>Trevor Bird, Jiri Dolezal, Mike Barbetti and Roger Francey</i>	99
Changes in Forest Health associated with Short-term Climatic Fluctuation <i>Tim Wardlaw</i>	107
The Role of Insects in Changing Forest Vegetation in Tasmania <i>Humphrey Elliott</i>	111
Effects of Fire on the Floristic Composition, Structure and Flammability of Rainforest Vegetation <i>Mirranie Barker</i>	117
Invading Alien Plants <i>Tim Duckett</i>	121
<i>Phytophthora</i>, Fire and Change in Vegetation <i>Frank Podger</i>	125
Threatened Species from Tasmania's Remnant Grasslands <i>Louise Gilfedder</i>	129
Two Moorland Boundaries <i>Jayne Balmer</i>	133
Change in Rainforest Vegetation in Tasmania <i>John Hickey</i>	143

Eucalypts in Tasmania's Changing Landscape <i>Fred Duncan</i>	151
Succession in Rainforest Lichens <i>Gintaras Kantvilas</i>	167
The Implications of Vegetation Change for Animals and their Habitats <i>Alastair Richardson</i>	173
The Response of Eucalypt Populations to a Changing Environment <i>Brad Potts</i>	179
Concluding Remarks: Science, Conservation and Management of Tasmanian Vegetation Change <i>Mick Brown</i>	195

Corrigendum

Tasforests 2 (1)—Table 2, p.18

Species numbered 32–37 are incorrectly given as resistant to infection by *Phytophthora cinnamomi*; numbers 32–37 are, in fact, susceptible. Resistant species are numbers 38–61 inclusive (correctly shown in Table 2).
